# Introduction & Purpose of the Report

## Introduction

The Standards Assessment Report is designed to serve as a valuable self-assessment and as a tool to help schools prepare for their Quality Assurance Review. The report is based on the AdvancED standards, which serve as the foundation of the accreditation process. In order to earn and maintain accreditation, schools must meet the AdvancED standards, engage in a process of continuous improvement, and host a Quality Assurance Review at least once every five years.

The Standards Assessment Report engages the school community in an in-depth assessment of each of the seven AdvancED standards. In completing the report, the school identifies the data, information, evidence, and documented results that validate that it is meeting each standard. This self assessment helps the school identify areas of strength and opportunities for improvement.

The Standards Assessment Report also serves as the primary resource for the Quality Assurance Review Team, which uses the report to prepare for the visit to the school. The team uses insights gathered from the report and information obtained during the on-site visit to provide feedback to the school and to make an accreditation recommendation.

## Structure of the Report

The Standards Assessment Report is organized by the AdvancED standards. For each standard, the report includes four sections: 1) considering the evidence; 2) indicators rubric; 3) focus questions; and 4) overall assessment. Each section reinforces the other sections by asking a question that builds on the prior section.

The section entitled "considering the evidence" allows school personnel to think about the practices and/or processes being implemented and identify evidence that will support its responses to the indicators rubric and focus questions. This section helps school stakeholders engage in a discussion about how it knows it is adhering to the standards. The section is not intended to engage the school in a collection of evidence, but rather in thoughtful dialogue about how it can demonstrate that quality practices, conditions, and results are occurring in the school. The section asks, "What practices/processes are being implemented, and are they effective?" or said another way, "How do we know we are doing what we say we are doing?"

The indicators rubric enables the school to assess the degree to which practices and/or processes are in place that indicate adherence to the standard and indicators. For each indicator, the school may check if the practices and/or processes are highly functional in the school, operational, emerging, or not evident. The school should use the rubric as an opportunity to ask itself challenging questions and to respond with accurate answers geared toward self-improvement. After completing the rubric, the school can quickly see areas of strength and opportunity. The section asks, "To what degree are the noted practices/processes in place?"

The focus questions allow the school to expand on and think more deeply about the responses to the

indicators rubric. The focus questions provide an opportunity for the school to describe the systematic and systemic processes that are in place to support its ability to meet the indicators. The section asks, "How are the practices/processes implemented?"

The overall assessment describes how well schools are implementing practices and/or processes and the impact these practices and/or processes have on student results and overall school effectiveness. The overall assessment helps schools judge where they are in relation to each standard. The "operational" level is required in order to demonstrate meeting the standard. The section asks, "How well are we meeting the standard overall?"
